Dear Dan,

Enclosed are some of the data on SK, TC, and BK cleavage with the endonucleases. I am sending along some of the original data together with a copy for you to make up. I am keeping one copy here so we can discuss the patterns on the phone. Also enclosed are two loose pictures - ① which shows the split of TC into "C, D, & E" and ② just to show how nicely my Hin prep worked on 1 phase.

Could we get together by phone next Friday?

Many thanks.

Mom,  
Bernie
